Art Unit: 2611

Allowable Subject Matter

 The indicated allowability of claims 1-18 is withdrawn in view of the newly discovered reference(s) to Kuchi (US Patent No.: 7065156). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claims 1,7,8,14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuchi (US Patent No.: 7065156) in view of Goodings (US Publication No.: 20040013166).
 - a. Claims 1,8,
 - i. Kuchi discloses
 - "transmitting a first copy of a signal from an antenna, the signal comprising a plurality of time-division multiple access (TDMA) frames"
 (Fig. 4, path comprising labels 208,406 and Col. 5, line 67 discloses the system can function in TDMA, Fig. 3b, labels 326a,326b show the different symbols or frames for transmission)
 - "transmitting a second copy of the signal from the antenna, the second copy having a fixed delay and a random phase relative to the first copy

Application/Control Number: 10/683,891 Page 3

Art Unit: 2611

of the signal, wherein the random phase changes from one of the TDMA frames to another of the TDMA frames" (Fig. 4, path comprising labels 206,402,404, label 206 as the delay and label 402 as the random phase, Col. 3, lines 60-65 discloses "an incremental phase shift is used for each burst", Col. 4, lines 25-35 discloses the "offset block 206 causes an at least one symbol period delay in X(t) to generate an offset version of X(t) for O(t)." and Fig. 4 shows the first path that produces the first copy receives X(t).)

- ii. Kuchi fails to disclose "the first copy of the signal and the second copy of the signal are transmitted using hopping carrier frequencies".
- iii. Goodings discloses such a limitation. (paragraphs 5,8 discloses TDMA and frequency hopping system for transmitting signals.) It would have been obvious to one skilled in the art to incorporate frequency hopping as disclosed by Goodings into Kuchi's TDMA system as disclosed in Col. 5, line 65 Col. 6, line 6 so to provide better voice quality and improved reliability.
- b. Claim 7,14, Kuchi discloses "forming the signal based on a speech signal by baseband channel coding and interleaving acts, a modulation act, and a pulse shaping act." (Fig. 1a, label 104)

Allowable Subject Matter

3. Claims 16-17,20-21 are allowed over prior art.

Art Unit: 2611

4. Claims 2-6,9-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Linda Wong whose telephone number is 571-272-6044. The examiner can normally be reached on 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Payne can be reached on (571) 272-3024. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
